# Welcome to Team IMPACT

*'I did the TENS course and it completely blew my mind!  
I completely changed the way that I thought about and  
taught maths.'*

*Kate Larner*

# Hear just some of our success stories

From those who've undertaken this incredible journey with us

Feeling so positive about maths in my classroom thanks to you Karen!!  
Our new head observed a maths lesson in my reception class yesterday and he couldn't believe the links children were making:

'I know it's 6 because I know one more than 5 is 6'

'Yes but also one more would make it 7'

'I can see these 5 counters look like a firework and in that firework is a triangle shape because it's got 3 corners'

'It's 6 because there are 3 equal groups of 2.'

Our Key Stage 1 staff are just starting the journey now and it's so exciting

Emily Parker

I remembered doing face to face training with Karen a few years previously and thought I would give it a go. Well what a game changer decision that was!

I did the TENS course and it completely blew my mind 🤯🌀. I completely changed the way that I thought about and taught maths.

The Year 1 teacher began to comment on how the cohort I had sent up were amazing at maths, which made me want to learn more.

Kate Larner

That made so much sense to me and I question why we haven't ever been taught this, even as teachers. The structure of a number! I can see how young children will be able to have a clear visual when talking about a number, as in my experience children have no idea what 23 looks like in terms of quantity, they just refer to it as a big number as they can't visualise.

# Option 1: Bronze Team IMPACT Training Offer

## Training Outcome:

Our Bronze Team IMPACT aims to give all participating practitioners, whether they work in schools, PVI settings and child minders, the necessary Mathematical subject knowledge and pedagogical skill (*how children learn*) to effectively teach 'Essential Number Sense' and begin to explore effective practice in all other areas of teaching Maths: consequently improving the life chances of every child they teach.

## What's included?

The transformative TENS ('Teaching Essential Number Sense') course

- 12 months unlimited access for every member to the 100% game-changing 4-module online 'Teaching Essential Number Sense' course (For full details please visit <https://www.eymaths.co.uk/tens>).
- A personal online library for every participant easily accessed through the EYMaths website
- Professional certification for every member who successfully completes this course
- Module assessments for quality assurance

## Bonus Training

- FREE access to our three LIVE termly challenges offering a unique opportunity to work directly with Karen and a wide range of practitioners representing all roles in the Early Years and from all over the World. These short challenges attract both those who are new to Karen's work as well as those who are more experienced and willing to share their practice. A totally unique and joyful experience in every way.

## PLUS 7 Transformative Webinars

- Teaching Number Sense Mastery Through Self-Registration
- Teaching Time In the Early Years 3-5- Calendars, Visual Timetables and more!
- Introducing 5 and 10 Frames to Teach Part/Whole and Early Addition and Subtraction
- Teaching Shape in the Early Years: 'We Need to Talk About the 2D Shape Drawer!' (2 webinars)
- The Power and Potential of Documentation: How can we help others understand how we teach Maths in the Early Years?
- Teaching Maths Through Stories: 'The Doorbell Rang' (Early division focus)

**Cost:** From £49 to £119 per person (*and compared with £399 pp when purchased as an individual and dependent upon numbers invested in*)

# More of our success stories

From those who've undertaken this incredible journey with us

“

I suddenly not only "got" why subitising is in the curriculum, but was wondering why it isn't front and centre. I swapped 'how many' for 'what do you see?' and after constant modelling, the things the children did see were amazing. And their reasoning to justify their responses was too. I started using ten frames correctly - no counting please! After that I was hooked. I committed to Impact and haven't looked back.

”

S Eldred, Fremantle, Western Australia

“

My biggest wow bomb was the importance of noticing. And just how much we need to nurture this skill. And slow down. Other wow bombs were that the digit is not the number just as the word apple is not the apple. And the shape webinar also blew my mind. But the wow bombs came so thick and fast it's hard to remember. It struck me that this wasn't just important for EYFS maths but that all the maths I'd ever taught and all the children I'd taught who'd struggled was because of the way we had taught maths.

”

E Morgan, EYFS Teacher, UK

“

My manager invested in Team Impact trainings; self-registration, calendar, five and ten frames are part of our daily routine; we changed the way we ask questions; everyone says what do you see/notice, hardly ever how many; last year cohort showed confidence in understanding number sense; children with EAL and SEND were surprising us every day with their understanding and the way they were able to explain what they understood; as a team we joined all the challenges last year (my whole team joined Super Subitising this year); we had a coffee morning with parents where we were talking about subitising, parents are involved in their children's learning, they support children during self-registration, 3 parents joined Super Subitising challenge this year. My confidence has grown because of my better subject knowledge (the collection of books on Karen's shelf in my house also has grown 😊)

”

Zofia Rutkiewicz, Early Years Teacher, London

## Option 2: Silver Team IMPACT Training Offer

### How does Silver Team IMPACT differ to Bronze Team IMPACT?

**IMPACT Membership:** Silver Team IMPACT gives the lead practitioners (1 per participating school or setting) the opportunity to join our exclusive 'IMPACT' membership. This offers access to our weekly Q&A sessions, monthly training sessions (both with Karen) and direct access to Karen and the support, understanding and encouragement of a group of like-minded members from every part of the world and every role in education.

All participating practitioners, whether you and your team work in schools, PVI settings and child minders, will receive the necessary Mathematical subject knowledge and pedagogical skill (how children learn) to effectively teach not only 'Essential Number Sense' but ALL areas of Mathematics: consequently improving the life chances of every child they teach.

### What's included?

The transformative TENS ('Teaching Essential Number Sense') course

- 12 months unlimited access for every member to the 100% game-changing 4-module online 'Teaching Essential Number Sense' course (*For full details please visit <https://www.eymaths.co.uk/tens>*).
- A personal online library for every participant easily accessed through the EYMaths website
- Professional certification for every member who successfully completes this course
- Module assessments for quality assurance

### Bonus Courses

- Teaching Maths Through Stories (2 course featuring 6 texts)
- Essential Foundations Course: How to Create Outstanding Mathematical Provision for Every Child in the Early Years 3-5'
- Teaching Maths Outdoors 'The Obstacle Race'
- FREE access to our three LIVE termly challenges (all optional participation). An opportunity to work directly with Karen and a wide range of practitioners representing all roles in the Early Years and from all over the World. These short challenges attract both those new to Karen's work and EYMaths as well as those who are more experienced and willing to share their practice. A totally unique and joyful experience in every way

## PLUS and Extended Library of Transformative Webinars Including

- Teaching Number Sense Mastery Through Self-Registration
- Teaching Time In the Early Years 3-5- Calendars, Visual Timetables and more!
- Introducing 5 and 10 Frames to Teach Part/Whole and Early Addition and Subtraction
- Teaching Shape in the Early Years: 'We Need to Talk About the 2D Shape Drawer!' (2 webinars)
- The Power and Potential of Documentation: How can we help others understand how we teach Maths in the Early Years?
- Teaching Maths Through Stories: 'The Doorbell Rang' (Early division focus)
- Transforming your long, medium and short-term planning
- Teaching Money in the Early Years
- Teaching Pattern
- Teaching Spatial Reasoning

**Cost:** From £69 to £159 per person (compared with £499 pp when purchased as an individual and numbers invested in)

Our team are now walking talking Karen people, asking children what they see and notice and subitising everything and anything!  
And saving the best until last (of this chapter of my story) is the complete and incredible change in our children's understanding of maths. Last year they made so much more progress in their maths understanding and I know that it was supported by my new and improved understanding of what I now know.

S Gough, Early Years Practitioner, Essex

## Option 3: Gold Team IMPACT Training Offer:

### How does Gold Team IMPACT Silver differ to Silver Team IMPACT?

**IMPACT Membership:** Gold Team IMPACT not only offers the lead practitioners (1 per participating school or setting) the opportunity to join our exclusive 'IMPACT' membership (*giving access to our weekly Q&A sessions, monthly training sessions, direct access to Karen and the support, understanding and encouragement of a group of like-minded members from all parts of the world and every role in education BUT also includes two bespoke LIVE training sessions with Karen* (instantly saving you £500 on the cost of purchasing these as individual sessions).

### Bespoke LIVE training with Karen

These live sessions are run on Zoom at a time that best suits you and your team and are there to:

- Share expert advice and model any aspects of the course you wish to dig more deeply in to
- Offer an opportunity for Q&A
- Support you as the leader and keep your team motivated and on track to successfully graduate from the accredited 'Teaching Essential Number Sense' course

As with Silver Team IMPACT, participating practitioners, whether you and your team work in schools, PVI settings and child minders, will receive the necessary Mathematical subject knowledge and pedagogical skill (how children learn) to effectively teach not only 'Essential Number Sense' but ALL areas of Mathematics: consequently improving the life chances of every child they teach.

“ I love having all the training at my fingertips and being part of such a fabulous, supportive community. Karen is an amazing trainer who not only provides fantastic maths training, but nurtures us so holistically and encourages us to be better versions of ourselves. I am loving my EYMaths journey and am excited for what is yet to come. ”
